raw datasets

data import

dataset-specific import scripts (peekbank-data-import)

data import: peekds*

R package for consolidating eye-tracking data into unified format

common format eye-tracking data unified schema consisting of 9 data tables

- datasets
- xy_timepointstrials
- subjects
- aoi_timepoints
 trial_types
 aoi_region_sets
 stimuli
- administrations
 aoi_region_sets

database provisioning: peekbank

Django app for populating the Peekbank database

the Peekbank database

repository of developmental eye-tracking datasets

data access: peekbankr*

R package providing an API for interacting with the Peekbank database

visualization: peekbank-shiny

Shiny app for visualizing data (in development)
